# WHAT WE DO

- IT/Network Infrastructure
- IT Hardware Supply
- Structured Cabling
- Surveillance & Security Systems
- Access Control & Time Attendance Systems
- Audio/Video Intercom systems
- Wireless & Wired Video conference Systems
- PABX, Telephone System
- Public Address/ Background Music System
- Parking/Vehicle Barrier systems
- Smart Home & Building Automation Solutions
- UPS SYSTEMS
- ID Card Printers
- Hardware and Software Maintenance
- AMC Services
- Web Development
- Search Engine Optimization
- Software Licensing

## IT/ Network Infrastructure

Advanced IT specialized in providing all kind of Network & IT infrastructure and related requirements in order as per your needs.

## IT Hardware Supply

Workstations, Laptops, Notebooks, Servers, Storage Devices, Printers, Scanners, Projectors, POS Terminals, UPS

# Structured Cabling

Using CAT6, Cat6 A, Fiber backbone, Switches and patch panels, Racks, Connectors and Face plates

# Surveillance & Security Systems

CCTV systems provide surveillance capabilities used in the protection of people, assets, and systems. A CCTV system serves mainly as a security force multiplier, providing surveillance for a larger area, more of the time, than would be feasible with security personnel alone. We use the latest technology based on IP on Raid Server and also hybrid version to blend a mix of exiting analog and expansion of IP cameras. Additional IR illuminators to cover larger of surveillance. CCTV systems are often used to support comprehensive security systems by incorporating video coverage and security alarms for barriers, intrusion detection, and access control.

# Access Control & Time Attendance Systems

Advanced web and PC based Time & Attendance software Systems integrated with finger print, bio metric card and smart card to manage attendance and access will allow you to have a wide range of data about your operations at your fingertips, enabling you to put efficiency measures in your work place for more productivity.

Compatible with latest Microsoft Windows environments, our system can be integrated with other third party systems. Easy-to-use, powerful time and attendance solution that allows you to automate your company's timekeeping, attendance tracking, costing jobs benefitting the administration of the organization.

# Audio/Video Intercom Systems

An Audio/ Video Intercom System allows you to see & hear an individual before granting access to your premise. It can be used as an initial or secondary level of Access Control. It would be the monitoring of an entrance at a commercial property / residential building / individual villa or office.

Provides controlled access to visitors or users of a site without the need for access control credentials. The flexibility of our systems means that you can have the most convenient and efficient system based on your specific needs(IP to computers, phones, mobiles and anything with connection to the network/ Internet)

## Wireless & Wired Video conference Systems

An advanced technology that allows users in different locations to hold face-to-face meetings without having to move to a single location together. Uses for video conferencing include holding routine meetings, negotiating business deals, and interviewing job candidates etc. We provide the best wireless video conferencing system which helps users to a much more professional meeting experience when using favorite cloud conference meetings, we make sure everyone in the room is captured properly while using the camera and audio device. What you achieve

- Improves communication
- Helps build relationships
- Saves money
- Saves time
- Streamlines collaboration
- Improves efficiency
- Increases productivity
- Makes scheduling meetings easier

# PABX, Telephone System

Private Branch Exchange system – a private telephone exchange to managing internal calling system. This can be implemented in bigger organisation to individual residential purpose. A limited no of telephone lines can be shared to multiple extension internally and to communicate freely with interntal members. It can be connected with multiple branched with multiple features ranging from conference call and voip calls.

# Public Address/ Background Music System

A public address system (PA system) is an electronic system comprising microphones, amplifiers, loudspeakers, and related equipment. It increases the apparent volume (loudness) of a human voice, musical instrument, or other acoustic sound source or recorded sound or music.

PA/BGM systems are used in any public venue that requires that an announcer, performer, etc. be sufficiently audible at a distance or over a large area. Typical applications include sports stadiums, schools, Mall, Hotels place of worship, public transportation vehicles and facilities, and live or recorded music venues and events. A PA/BGM system may include multiple microphones or other sound sources, a mixing console to combine and modify multiple sources, and multiple amplifiers and loudspeakers for louder volume or wider distribution

# Parking/Vehicle Barrier systems

Barriers are used to control access at the entrance to vehicle parks, service yards and restricted areas. A great, low-cost way to improve security and privacy, monitor and control the flow of traffic in and out from the property. Rising Boom Car Park Barriers for car parks have a pivoting arm which rises perpendicular with the ground when in the open position

We Supply the wide range of Parking/vehicle barrier systems where you can manage and control the parking spaces and the entry/exit of your premises. We also provide control system based on UHF readers which will allow/control the authorize entry/exit.

## Smart Home & Building Automation Solutions

Makes your place convenient, comfortable, enjoyable, and cost effective. By integrating the most advanced smart home and building automation technologies, we bring you a complete solution that is crafted to suit your unique needs. We offer smart home and building automation solutions for Apartments, Villas, Hotels, Resorts, Office & Meeting rooms, Factories and Schools. Advanced IT also provides home theater systems and parking management systems. | Home Automation | Audio/Video Control | Lighting Control | Curtain Control | Green Home/ Energy Management

We provides an extensive range of the UPS and related accessories as per the needs. We provide 1KVA to the range of 30 KVA and above (Single and Three Phase UPS) compatible with all kind of windows environment to management online functionalities.

# ID Card Printers

ID cards have become a crucial part of the business world, making it possible to simultaneously simplify employee and visitor identification and enhance a company's integrity and security. ID cards typically include an employee's name, photo, job title and department, making quick personal identification a snap.

It is mainly used to restrict unauthorized access and to allow authorized users to access designated entry securely based on multiple criterias. We provide employee and student identification solutions with the help of world class ID card printing Systems.

## Hardware and Software Maintenance

We do maintenance for all kind of IT related hardware equipments. Hardware maintenance on Main board and Power supply units. Software maintenance related to operating systems and application programs in order to correct executional erros and add new functionalities.

## AMC Services

We provides AMC services for all the above mentioned ELV systems where we can do timely maintenance of valuable and sophisticate systems. This brings a hassle- free environment to your establishments. We provide AMC services based on a comprehensive and non-comprehensive manner as per one's requirement.

# Web Development

Our Web development Team has the expertise to create an over-the-expectations websites. We develop business websites as well as e-commerce websites. We develop websites that are Interactive and mobile-friendly and that are easily managed. No need for technical background. With some training you will be able to add and edit content.

## Search Engine Optimization

Advanced IT is a top SEO Service provider in Oman. Our SEO expert is works on SEO Projects in Both Arabic & English. Our clients enjoy high rankings in search engines and in a very cost effective way. We simply convert your website to a marketing agent that works 24/7 and gets you more business.
